Hi Everyone,

FYI on the email I just sent to FDA. I'll be letting you know when they're available to meet. Thanks,

Jess

Subject: PFAS Materials Check In

Hi Frank and Larry,

I hope you are both doing well. I am reaching out based on some materials FDA has put together regarding PFAS contamination. One is a poster that was used by FDA at a poster session, and which was provided to EPA by Associated Press with a request for comment. The second, which is attached, was provided to EPA by FDA as an FYI. It is our understanding that this will be formally rolled out by FDA in conjunction with a press release later this week.

Regarding the attached, and in the interest of our ongoing commitment to good risk communication, we are hoping to circle up to have a discussion prior to this being formally rolled out. As we have already received questions I imagine we will receive additional questions once this is released and we think it

would be a good idea to take a proactive approach to ensuring we are providing the same messages in dealing with PFAS contamination.

Based on the timeline we believe FDA to be operating under, we are happy to be flexible here to make a conversation happen ASAP. Thanks so much and we look forward to talking with you again.

Kindest Regards,

Jessica
